The Dynamic Earth. Students will spend their sixth grade year in science studying how matter and energy cycle and flow through the Earth system. They begin the year with a unit that includes developing an understanding of matter, energy, the Earth's spheres and how weathering and erosion change the Earth's surface.

Over the years, I have learned that as middle school students learn these steps, they need an abbreviated version to begin to understand the process. These 6 steps provide an easy, systematic method for them to understand how to carry out investigations. Teacher Tip: Have students write Bell Ringer answers in their Science Journal. This not ...

Method

Journal Writing Examples and Activities— Journaling is one of the most effective and engaging ways for teachers to help students develop a true love of writing. While many writing activities will help students become stronger writers, journaling offers room for creativity and self-expression that formats like research papers and reports simply can't compete with.
