### Data Communication And Networking Notes PDF 2021 B-Tech

In computer networking, encapsulation is a method of designing modular communication protocols in which logically separate functions in the network are abstracted from their underlying structures by inclusion or information hiding within higher-level objects. In other words, encapsulation "takes information from a higher layer and adds a header to it, treating the higher layer information as ...

### Encapsulation (networking) – Wikipedia

Explanation – After representing first two 1's of data we encounter four consecutive zeros.Since our last substitutions were two 1's(thus number of non-zero pulses is even).So,we substitute four zeros with "B00V". Note – Zero non-zero pulses are also even. Reference-Data Communications and Networking By Behrouz A.Forouzan (Book)
