When you move the object close to the screen, the shadows overlap, leaving a very dark (black) shadow where the object blocks both lights. When you turn off the green light, leaving on the red and blue lights, the screen will appear to be magenta, a mixture of red and blue. The shadows will be red and blue.

And if there is a shadow, it is not as dark as they are in shadows cast in hard light. Think of soft light as how things look on a cloudy day or an overcast day, with clouds creating a diffusion between the sun and an object. The cloud diffuses the light from the sun, which lights the object from every direction, creating a soft light.
