Grade Six California Mathematics Framework. represents a reflection across the y -axis. A change in the x -coordinate from $(-2, 4)$ to $(2, 4)$, represents a reflection across the y -axis. When the signs of both coordinates change—for example, when $(2, -4)$ changes to $(-2, 4)$ —the ordered pair is reflected across both axes.

Print this page. In Grade 6, instructional time should focus on four critical areas: (1) connecting ratio and rate to whole number multiplication and division and using concepts of ratio and rate to solve problems; (2) completing understanding of division of fractions and extending the notion of number to the system of rational numbers, which includes negative numbers; (3) writing, interpreting, and using expressions and equations; and (4) developing understanding of statistical thinking.
