A birth defect, also known as a congenital disorder, is a condition present at birth regardless of its cause. Birth defects may result in disabilities that may be physical, intellectual, or developmental. The disabilities can range from mild to severe. Birth defects are divided into two main types: structural disorders in which problems are seen with the shape of a body part and functional ...

Preterm birth remains a common cause of neonatal mortality, with a disproportionately high burden in low-income and middle-income countries. Meta-analyses of low-dose aspirin to prevent pre-eclampsia suggest that the incidence of preterm birth might also be decreased, particularly if initiated before 16 weeks of gestation.

Caesarean section, also known as C-section, or caesarean delivery, is the surgical procedure by which a baby is delivered through an incision in the mother's abdomen, often performed because vaginal delivery would put the baby or mother at risk. Reasons for this include obstructed labor, twin pregnancy, high blood pressure in the mother, breech birth, and problems with the placenta or ...

Caesarean section - Wikipedia
Worldwide, preeclampsia is responsible for up to 20% of the 13 million preterm births each year. A baby is considered premature if he or she is born before 37 weeks, but more severe issues occur when a baby is born earlier than 32 weeks.

Polyhydramnios or commonly referred to as “ Poly, ” is a relatively rare condition that happens in about one percent of pregnancies.. Polyhydramnios occurs when excess amniotic fluid accumulates in the uterus during pregnancy. The excess in amniotic fluid is opposite of oligohydramnios which means there is low amniotic fluid. In most cases, polyhydramnios is harmless, but it does have the ...

In vitro fertilisation (IVF) is a process of fertilisation where an egg is combined with sperm outside the body, in vitro ("in glass"). The process involves monitoring and stimulating a person's ovulatory process, removing an ovum or ova (egg or eggs) from their ovaries and letting sperm fertilise them in a culture medium in a laboratory. After the fertilised egg undergoes embryo culture for 2 ...
