One definition of a program is a temporary organization created to coordinate, direct the work, and supervise the delivery of a number of related projects that all contribute to a particular outcome. A project, on the other hand, is a temporary organization designed to deliver a particular output.

What's the Difference Between Projects & Programs...

A project represents a single, focused endeavour. A program is a collection of projects — together all the projects form a connected package of work. The different projects complement each other to assist the program in achieving its overall objectives.

The Difference Between a Project and a Program | APMG ...

While most programs are likely to be larger, more complex, and less certain than most projects, the key differentiator between a program and a project is, as described earlier, their objective. Programs are focused on realizing benefits; projects are focused on delivering defined outputs. One of the major roles of a program manager is to initiate projects to create the outputs the program ...

Understanding Programs and Projects - PMI

Projects Programs Portfolios: Monitoring and Control: Project management is in charge of taking care of the project and its deliverables. Using program governance, program manager monitors and controls the program. Portfolio manager measures the aggregated performance.
