To my knowledge, this book and its associated iPad and iPhone application is the most comprehensive tool on the subject and promises to be the tool to which all future tools on this subject are compared.

Hand Bone Age: A Digital Atlas of Skeletal Maturity, 2nd ...

For decades, the determination of bone maturity has relied on a visual evaluation of skeletal development in the hand and wrist, most commonly using the Greulich and Pyle atlas. The Gilsanz and Ratib digital atlas takes advantage of the advent of digital imaging and provides a more effective and objective approach to skeletal maturity assessment. This atlas integrates the key morphological features of ossification in the bones of the hand and wrist and provides idealized, sex- and age ...

Hand Bone Age - A Digital Atlas of Skeletal Maturity ...

Hand Bone Age: A Digital Atlas of Skeletal Maturity. New York, NY: Springer, 2005. ISBN 3-540-20951-4. Softcover, 98 pages, 88 illustrations, with CD-ROM; \$79.95. The idea is one of convenience—using digital and computer technology to generate idealized images of the hand and wrist to compare them with clinical bone age radiographs and then automatically generate the statistical data on the patient based on an entered gender and chronologic age.

Hand Bone Age: A Digital Atlas of Skeletal Maturity ...

In this paper, we present our system design and initial implementation of a digital hand atlas and computer-aided diagnostic (CAD) system for Web-based bone age assessment. The CAD system is built on top of existing picture archiving and communication system (PACS), as well as recent advances in Internet technology.

Digital hand atlas and web-based bone age assessment ...

The bone age radiograph of the hand and wrist is a commonly performed examination to determine the radiographic age of the patient via the assessment of growth centers.

Bone age (radiograph) | Radiology Reference Article ...

Tanner-Whitehouse (TW) method involves the scoring of each carpal bone, the radius and ulna leading to a total score, from which age can be estimated 2 In addition, software tools are available to automate the task of bone age assessment. In 2017, the RSNA held a machine learning challenge to automate bone age assessment.

Bone age assessment | Radiology Reference Article ...

A radiograph of the left hand has become the established tool for determining skeletal age in children aged 3 months and older. This method is easy to perform and requires very little radiation exposure. The technical parameters are as follows: • Free exposure at 30 – 45 kV and 3 – 6 mA

Skeletal Age | Radiology Key

people with cancers of the blood or bone marrow such as leukaemia, lymphoma or myeloma who are at any stage of treatment people having immunotherapy or other continuing antibody treatments for cancer
