"When it comes to sports memorabilia, Mantle is king. No other sports athlete has been covered more or is more popular than Mantle, bar none. No one comes close." —T.S. O'Connell, editor of Sports Collector's Digest Mickey Mantle is one of the most beloved sports figures of all times. Playing brilliantly for the New York Yankees, Mantle won three American League Most Valuable Player Awards and was named to 16 All Star games. He played on 12 pennant winners and seven World Series Championship clubs with the Yankees. He still holds records for most World Series home runs, RBIs, runs, walks, extra-base hits, and total bases, all topped off by his induction in the Baseball Hall of Fame in 1974. Fifteen years after his death, his memorabilia is still the most sought after of any sports figures past or present. Mickey Mantle: Memories and Memorabilia highlights the life, memories, and memorabilia of one of American sports' all time greatest heroes. With over 600 images of fantastic photography and artwork, no book on the market captures the history, nostalgia, memories, and memorabilia of the man they call "The Mick."

The essays in this book examine various forms of popular culture and the ways in which they represent, shape, and are constrained by notions about and issues within higher education. From an exploration of rap music to an analysis of how the academy presents and markets itself on the World Wide Web, the essays focus attention on higher education issues that are bound up in the workings and effects of popular culture.

This volume constitutes the refereed proceedings of the 9th International Conference on Image and Signal Processing, ICISP 2020, which was due to be held in Marrakesh, Morocco, in June 2020. The contributions presented in this volume were organized in the following topical sections: digital cultural heritage & color and spectral imaging; data and image processing for precision agriculture; machine learning application and innovation; biomedical imaging; deep learning and applications; pattern recognition; segmentation and retrieval; mathematical imaging & signal processing.

In these days of an aging traditional audience, shrinking attendance, tightened budgets, increased competition, and exponential growth in new types of communication methods, America's house museums need to take bold steps and expand their overall purpose beyond those of the traditional museum. They need not only to engage the communities surrounding them, but also to collaborate with visitors on the type and quality of experience they provide. This book is a groundbreaking manifesto that calls for the establishment of a more inclusive, visitor-centered paradigm based on the shared experience of human habitation. It draws inspiration from film, theater, public art, and urban design to transform historic house museums while providing a how-to guide for making historic house museums sustainable, through five primary themes: communicating with the surrounding community, engaging the community, re-imagining the visitor experience, celebrating the detritus of human habitation, and acknowledging the illusion of the shelter's authenticity. Anarchist's Guide to Historic House Museums offers a wry, but informed, rule-breaking perspective from authors with years of experience and gives numerous vivid examples of both good and not-so-good practices from house museums in the U.S.

A celebration of the many motor trikes and three-wheeled motorcycles produced since the early days of motoring. Featuring easy-to-read captions with minimum jargon: it will delight both enthusiasts and the novices alike.
