Iguana (/ ˈw ɪ n /, Spanish:) is a genus of herbivorous lizards that are native to tropical areas of Mexico, Central America, South America, and the Caribbean. The genus was first described in 1768 by Austrian naturalist Josephus Nicolaus Laurenti in his book Specimen Medicum, Exhibens Synopsin Reptilium Emendatam cum Experimentis circa Venena. ...

Iguana - Wikipedia

Iguana, any of eight genera and roughly 30 species of the larger members of the lizard family Iguanidae. The name iguana usually refers only to the members of the subfamily Iguaninae. The best-known species is the common, or green, iguana (*Iguana iguana*), which occurs from Mexico southward to Brazil.

Iguana (Iguana Iguana) | Incredible Facts | A-Z Animals

The iguana is a tropical animal. It wants to bask at 95 degrees Fahrenheit, and its habitat shouldn't drop below 75 degrees Fahrenheit. In fact, the iguana needs a temperature around 85 degrees Fahrenheit to properly digest its food. This should be closely monitored, especially if you're adjusting the climate of an entire room for its habitat.

A Guide to Caring for Iguanas as Pets

The green iguana (*Iguana iguana*), also known as the American iguana, is a large, arboreal, mostly herbivorous species of lizard of the genus *Iguana*. Usually, this animal is simply called the iguana. The green iguana ranges over a large geographic area; it is native from southern Brazil and Paraguay as far north as Mexico, and has been introduced from South America to Puerto Rico and is very ...
