serious learning America is in crisis, from the university to the workplace. Toxic ideas first spread by higher education have undermined humanistic values, fueled intolerance, and widened divisions in our larger culture. Chaucer, Shakespeare and Milton? Oppressive. American history? Tyranny. Professors correcting grammar and spelling, or employers hiring by merit? Racist and sexist. Students emerge into the working world believing that human beings are defined by their skin color, gender, and sexual preference, and that oppression based on these characteristics is the American experience. Speech that challenges these campus orthodoxies is silenced with brute force. The Diversity Delusion argues that the root of this problem is the belief in America's endemic racism and sexism, a belief that has engendered a metastasizing diversity bureaucracy in society and academia. Diversity commissars denounce meritocratic standards as discriminatory, enforce hiring quotas, and teach students and adults alike to think of themselves as perpetual victims. From #MeToo mania that blurs flirtations with criminal acts, to implicit bias and diversity compliance training that sees racism in every interaction, Heather Mac Donald argues that we are creating a nation of narrowed minds, primed for grievance, and that we are putting our competitive edge at risk. But there is hope in the works of authors, composers, and artists who have long inspired the best in us. Compiling the

author's decades of research and writing on the subject, *The Diversity Delusion* calls for a return to the classical liberal pursuits of open-minded inquiry and expression, by which everyone can discover a common humanity.

The #1 New York Times bestseller by Tom Brady, six-time Super Bowl champion and one of the NFL's 100 Greatest Players of All Time. In this new edition of *The TB12 Method*, Tom Brady further explains and details the revolutionary training, conditioning, and wellness system that has kept him atop the NFL at an age when most players are deep into retirement. Brady—along with the expert Body Coaches at TB12, the performance lifestyle brand he cofounded in 2013—explain the principles and philosophies of pliability, a paradigm-shifting fitness concept that focuses on a more natural, healthier way of exercising, training, and living. Filled with lessons from Brady’s own training regimen, *The TB12 Method* provides step-by-step guidance on how develop and maintain one’s own

four-thirty one Saturday afternoon the laws of physics as we know them underwent a change. Electronic devices, cars, industries stopped. The lights went out. Any technology more complicated than a lever or pulley simply wouldn't work. A new set of rules took its place—laws that could only be called magic. Ninety-nine percent of humanity has simply vanished. Cities lie abandoned. Supernatural creatures wander the silenced achievements of a halted civilization. Pete Garey has survived the Change and its ensuing chaos. He wanders the southeastern United States, scavenging, lying low. Learning. One day he makes an unexpected friend: a smartassed unicorn with serious attitude. Pete names her Ariel and teaches her how to talk, how to read, and how to survive in a world in which a unicorn horn has become a highly prized commodity. When they learn that there is a price quite literally on Ariel's head, the two unlikely companions set out from Atlanta to Manhattan to confront the sorcerer who wants her horn. And so begins a haunting, epic, and surprisingly funny journey through the remnants of a halted civilization in a desolated world.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."
