1. Site Analysis (LaGro) is the best for explaining the design process. 2. Sustainable Sites is a good one to have and review if you're studying for licensure and to reinforce sustainability in design. 3. Timesaver's Standards for Landscape Architecture is an excellent desk reference, the absolute best for technical information, and also the priciest.

**Landscape Architectural Graphic Standards 1st (first** **---**

Like Landscape Architectural Graphic Standards, this Student Edition provides essential specification and detailing information on the fundamentals of landscape architecture, including sustainable design principles, planting (including green roofs), stormwater management, and wetlands constuction and evaluation.

**Landscape Architectural Graphic Standards - Hopper, Leonard** **---**

Landscape architecture degree programs typically teach this process, along with associated graphic requirements. These courses do not typically cover the topic comprehensively or in great detail. While these skills can only be fully developed during years of practice, this publication may help to establish a stronger academic foundation before entering the practice.

First In Architecture provides guides, resources and downloads to architecture students and professionals to help them with their studies and future careers

**Home - First In Architecture**

Architectural Graphic Standards, as the first of many modern guides, attempted to isolate constructional and functional facts from aesthetic design decisions. Its broad acceptance by the profession can be traced through the manual's own history (Figure 1).
