This book examines the nature of 'liberal peace': the common aim of the international community's approach to post-conflict statebuilding. Adopting a particularly critical stance on this one-size-fits-all paradigm, it explores the process by breaking down liberal peace theory into its constituent parts: democratisation, free market reform and development, human rights, civil society, and the rule of law.

Abstract. Since the early 1990s, the projects of peace-building and state-building have increasingly been integrated. Since the early 2000s, this has been mainly an outcome of the United States' and the United Kingdom's support for an active, muscular and humanitarian internationalism.
