Nuclear 20 Why A Green

With renewables and efficiencies, new nuclear would provide the steady, safe, sustainable, carbon dioxide free, base power for the grid, in great plentitude, for all the needs on a fast growing planet. And this, in the magnitudes, that renewables and efficiencies would NOT COME CLOSE to achieving alone.

Nuclear 20 Why A Green Future Needs Nuclear Power [EPUB]

This confusion and multiplicity of definitions has particular implications for considering what the term “green” might mean for the nuclear-energy industry. Nuclear power is sometimes characterized as producing no GHGs, and while this is not completely true, it is certainly accurate to say that GHG emissions from nuclear power generation are much lower than those of fossil-fuel-based power sources.

How green is nuclear energy? – Physics World
While most of the population is happy about solar panels, nuclear energy has received much better funding. In the following infographic we break down why nuclear energy might not be as green as they are promoted. If you would like to use this infographic, use the embed code below:
