This book describes the different elastomers utilized in tyre retreading. Among others, it discusses reinforcing fillers in

Radial Tire

terms of their efficacy, the use of bonding agents, and their relevance to the tyre retreading process. The authors give specific guidelines for the practical compounding of different rubber compounds to make retread. A practical approach is also taken to describing the manufacturing

technology used in tyre  
retreading.

All the steps involved in  
planning, executing,  
interpreting and  
applying the results  
from a modal test are  
described in  
straightforward terms.

This edition has brought  
the previous book up to  
date by including all the  
new and improved

techniques that have emerged during the 15 years since the first edition was written, especially those of signal processing and modal analysis. New topics are introduced, notable amongst them are the application of modal testing to rotating machinery and the use of scanning laser vibrometer.
