Download Troubleshooting with the Windows Sysinternals ...

The problem is the Windows rundll32.exe utility, which can be used to arbitrarily run functions from DLL files. Since this utility is signed by Microsoft it shows up as a completely legit process in the list, but in reality what they are doing is just moving all of their malware / adware code into a .DLL file instead of a .EXE file, and then loading up the malware with rundll32.exe instead.
